

THE AXOPAR 38 RANGE EXPANDS WITH FURTHER MODELS

- The Axopar 38 range will expand with the introduction of the Axopar 38 Sun Top and Axopar 38 Cross Top in summer and fall 2026 - two open models built on the same platform as the Axopar 38 XC Cross Cabin, sharing hull design, drivability, and core functionalities.
- Same modular philosophy with multiple functional and social spaces on board and a wide range of layout options shared with the Cross Cabin model.
- Optional cockpit U-sofa configuration, available exclusively for the Axopar 38 Sun Top and Axopar 38 Cross Top.
- The modular U-sofa allows the backrests and armrests to be rearranged, enabling multiple seating and lounging possibilities
- With the large, foldable hi-lo table, the cockpit becomes a comfortable social area for dining, relaxing, or spending time at anchor.
- With the table lowered and cushions in place, the cockpit can be converted into a large sunbed, creating an additional lounging area that complements the foredeck sun area.
- The cockpit U-sofa enhances onboard sociability and flexibility, reinforcing the Sun Top and Cross Top models focus on open-air living and relaxed time on the water.
