

FLITE AIR X AXOPAR – KEY SPECIFICATIONS

Key highlights

- Rigid inflatable electric hydrofoil board with reinforced outer structure, designed specifically for use from boats
- Strong construction combining a solid standing platform with a lightweight, inflatable outer shell
- Reinforced dual-material outer skin made from textured PVC material, improving durability around docks, hulls, rocks, sand, and hard surfaces
- Buoyant and soft structure, offering a stable and confidence-inspiring learning experience
- Inflatable construction allows for easier storage, handling, and packing on board
- Integrated attachment point for securing the board alongside a boat
- Front grab handle and gear strap for carrying essentials while riding
- Integrated bungee system for securing gear during rides and exploration
- Dry bag solution to keep essentials safe and accessible on the water
- Custom deck pad with cord deck grip texture and laser-etched bathymetric pattern, providing comfort, grip, and style
- Exclusive Axopar colorway and graphics
- Dimensions: 1655 x 665 x 100 mm
- Volume: 92 liters (custom Axopar-specific size)

To create the most versatile and user-friendly package, the following configuration pairing is recommended:

- Flite AIR x Axopar Board
- Flite Jet 2 propulsion system for smooth and quiet performance
- Cruiser Jet 1500 Wing + Cruiser 300 stabilizer, offering the best all-round balance of stability, lift, and maneuverability for both beginners and experienced riders
- Flitecell Sport for optimal ride time and portability
- Flite Controller, delivering precise and intuitive control
- Slow Charger, ensuring safe and reliable charging for every session
